# Technology for Girls Workshop Series

Sponsored in part by IBM

These free workshops are for middle-school girls with a disability.  
Advanced registration is required.

## Dream It, Build It! • Tuesday, Oct. 6, 2009, 6 to 8 p.m.

If you can dream it, you can build it! Join us to put your creative thinking skills to the test while we design bridges, boats, and more. Toothpicks, pennies, aluminum foil, gumdrops, straws, and clay will be used to make a variety of structures. We will test our structures by adding weight. Come see which structures will fall and which ones will stand.

## My Messy Little Experiments • Tuesday, Jan. 12, 2010, 6 to 8 p.m.

Does an egg float or sink in water? How about a paper clip? How much water can a penny hold? Can a raisin really dance? We will answer questions you've had about science and have fun while completing all the little experiments you thought about trying at home but were too messy.

## Forensics: Be a CSI! • Tuesday, April 13, 2010, 6 to 8 p.m.

Put on your lab coat and come to PACER to be a crime scene investigator (CSI)! We will explore the science of forensics by fingerprinting, analyzing powders, making teeth impressions, and determining someone's height based on her shoe size. We will test our CSI skills by analyzing data and solving a mock crime.

### **Directions to PACER**

From I-494 take the Normandale Boulevard exit south to 84<sup>th</sup> Street; turn left. Take the next left onto the frontage road. PACER Center is a one-story brick building immediately north of the bridge. Turn right into the parking lot. Enter on the north side of the building.
