**Important For Rachel (support needs)**
Rachel has complex needs and these must be fully understood before you can properly support her.
You need to read the details of her file (including her health action plan) before supporting her as it contains vital, detailed information around staying healthy and safe.

Having the right equipment on hand to meet her needs – e.g. Day-bed, hoist fully charged, suction machine
Rachel eats and drinks using a PEG (gastrostomy tube) so she does not take any food, drink or medication orally, Rachel takes medication daily – refer to her medication chart for up-to-date information.
Rachel has epilepsy – refer to her care plan around how best to support her when she needs emergency medication for prolonged seizures
Rachel needs to stay calm and cool. If she gets upset she becomes hot and finds it difficult to control her saliva and manage her swallow – you need always to have suction equipment with you. She also must wear cool, loose-fitting clothes

Rachel is allergic to SORBITOL which is found in many forms of liquid medication and anti-biotic's
Rachel takes Baclofen her GP and dentist must always be reminded of this due to the risks associated with her neck and swallowing difficulties. Rachel is prone to chest infections.
