Tips for Families: Parent-Teacher Conferences

When families partner with their child's teachers, children are often more successful. Ask these questions at Parent-Teacher Conferences to help build that partnership. Time is limited, so pick 2-3 questions that are most important to you.

- How does my child learn? What are my child's strengths?
- Is my child meeting current grade level expectations? (*Ask about test & assessment scores.*)
- Are there areas where my child is struggling?
- Are there expectations for classroom participation? Is my child meeting them?
- Are there ways we can help at home with learning?
- What is the best way and time to communicate with you?

Additional topics you can discuss with the teacher:

- Your child's use of technology to do their schoolwork
- Skills that your child can work on during the summer
- Community programs to support learning, including: afterschool programs, summer camp, or tutoring and mentoring programs
