About you

Participants will learn:

- WHY!! A case for using visual strategies
- Tools and features to create a visually friendly environment

PACER CENTER C

Foundations

- First foundational principle
 - You need to understand why visuals are important
 - Visual learners do not respond to verbal language in the same way as other learners.
- Second foundational principle
 - You need to understand the relationship between verbal language learning and visual language learning
- Third foundational principle
 - You need to understand all the ways we can present a visual
 - Body language, facial expressions, picture representation, etc.
 PACER CENTER

I THINK IN PICTURES. Words are like a second language to me. I translate both spoken and written words into full-color movies, complete with sound, which run like a VCR tape in my head. When somebody speaks to me, his words are instantly translated into pictures. Language-based thinkers often find this phenomenon difficult to understand, but in my job as an equipment designer for the livestock industry, visual thinking is a tremendous advantage.

Dr. Temple Grandin

Making our Verbal Language Meaningful

- Commenting
- Repeating
- Scripting
- Creating a high probability of a yes response
- Giving choices
- Redirecting

Page 19

Did I really say that?

- When offering choices make sure you can live with both choices
- Make sure you're not mistakenly offering them an opportunity to say no
- Avoid/Reduce using no, don't and stop

Page 20

Para Verbals

- The bridge between our verbals and non verbals
- Consist of tone, prosody, intonation, inflection

Page 21

Body Language

- Facial expressions
- Movement of body
- Proximity
- Eye contact
- Body orientation or body in space
- Eye gaze and gaze shift
- Body stance
- Reaching, touching and pointing

Page 22

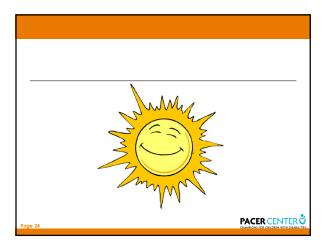

PACER CENTER 👶

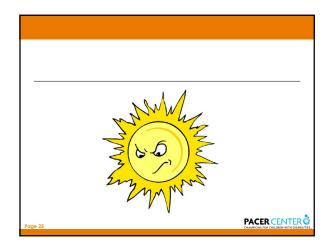

What Our Words Don't Say

- Smile or frown
- Open or closed body position
- Reactive or proactive body position
- Abrupt or calculated movements
- Touching and grabbing

Page 23

Visual Supports

- What are they?
- Who needs them?
- Why do we use them?

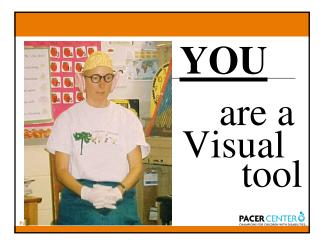

Page 2

PACER CENTER ©

1. You Are a Visual Tool

- facial expressions
- shaking or nodding your head
- holding out your hand
- holding up an object
- and lots more

Page 27

2. Naturally Occurring in the Environment

- objects, people
- pictures, posters, photographs
- printed material, books, labels, signs

Page 29

3. If we need more visuals we create them

- schedules
- calendars
- choice boards
- lists
- printed instruction
- behavior reminders
- Social stories
- AND MUCH MORE

Page 31

How do you use visual supports?

The Visual Tool Mini Test

Page 3

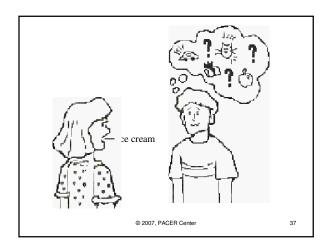

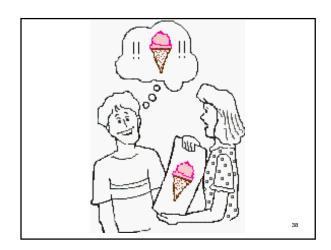

Visual Tools Mini Test Linda Hodgdon Visual Strategies for Improving Communication Do you have a calendar that you write things on to help you organize your life? Do you have a list of "things to do" on your desk or refligerator? Have you ever pointed to a picture in an advertisement or a menu to show someone what you want? Do you make up a shopping list before you go to the store? Bo you ever read a sign to tell you what line to stand in or what door to exit from? Have you ever followed a recipe in a cookbook to create some delicious dinner? Did you go back to that recipe each time you wanted to cook that item? Do you ever write notes to your family members reminding them to do things? Do you scan the menu to evaluate your choices before ordering in a restaurant? Have you ever made a check list for your children to help them remember to brush their teeth? Did you ever attach a note to your bathroom mitror to remind you to do something?

What images do you conjure when you hear "ice cream"?

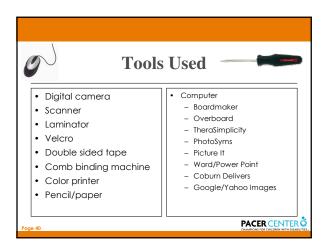

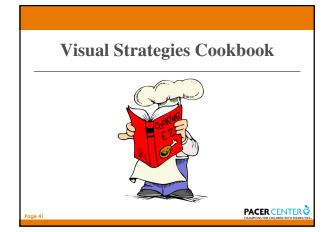

Who would benefit from visual supports?

© While visual supports have mainly been used to benefit students with ASD the bottom line is that visual supports benefit ALL learners.

Page 39

Problem: During instructional time, learner is distracted and not attending to speaker

Solution: Increase awareness of how to be a good listener

Systematically teach a listening unit use supporting material such as The Listening Walk and The Conversation

Create visuals to support the unit

visual of the listening rules

social story about listening and what listening looks like

☼ Initially use a heavy schedule of reinforcement to establish the listening rules

Support Material

☼ The Conversation Club
☼ Out of print; can purchase used copies (Amazon.com)

☼ I use as a framework for creating visual supports for listening and conversation

PACER CENTER O

When people talk to me, it's usually something I need to hear.

It's important to look at people & stop what I'm doing when they have something to tell me.

Sometimes grown-ups and kids tell me VERY important things that I need to know.

If I don't look & listen I might miss the message that they're trying to give me.

All the other kids look and listen when people talk to them. I know it's wrong to keep doing what I'm doing when grown-ups want me to listen.

When people talk to me, I will STOP what I'm doing and look & listen to them.

48

Problem: Students don't recognize when they are getting out of control; They lack awareness and strategies to keep their bodies in control

Solution: Use visuals to increase awareness of self and improve self monitoring skills

- Visual Thermometer
- Boiling Water

Page 49

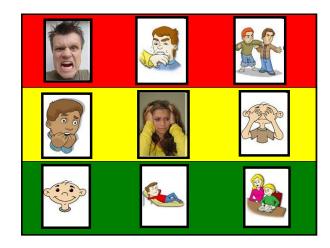

PACER CENTER CHAMPIONS FOR CHILDREN WITH DISABILITIES

Visual Thermometer

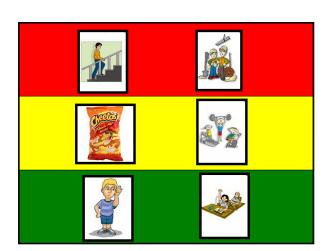

- Create a visual using color and words the learner has chosen or understands
- The goal is to increases their awareness and understanding of their bodies
- A tool to teach them self control
- Gives learners strategies to regulate their body

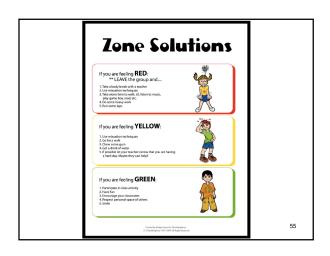

Page 50

If you are feeling RED: 1. Take a Body Break with a teacher 2. Use Relaxation techniques; (breathing, rubbing, chewy foods, sour candy, etc.) 3. Alone time to walk, sit, listen to music, play game boy, read 4. Visit the OT If you are feeling YELLOW: 1. Use relaxation techniques(Breathing, Rubbing, Squeezing) 2. Go for a walk 3. Chew Gum 4. Suck on a war head 5. Get a drink of water 6. If possible, let a teacher know that you are having a hard day...maybe we can help!! If you are feeling GREEN: 1. Participate in class activity 2. Earn points 3. Have fun 4. Smile 5. Give encouragement to your classmates 6. Respect personal space (hubble) of others

Problem: Students have difficulty understanding the passage of time and don't attend to clocks $\begin{tabular}{ll} \hline \end{tabular} \label{table}$

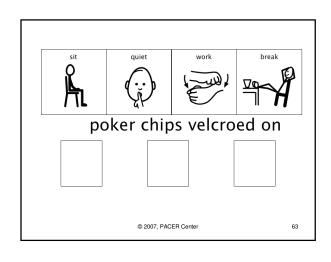

Solution: Visual "Timers"

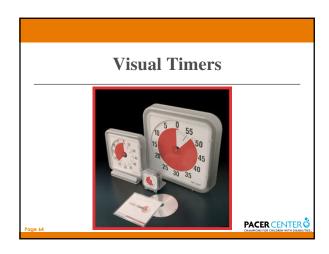

- $\ensuremath{\textcircled{\sc Use}}$ a token system to show the passage of time
- **(b)** Use anything that works
- $\ensuremath{\textcircled{\sc b}}$ We've used poker chips, pennies, nickels, circling letters, etc.

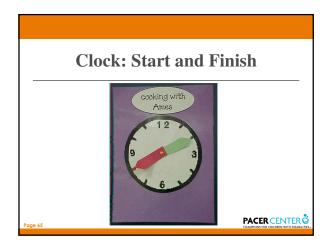

Page 60

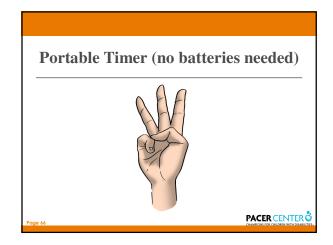

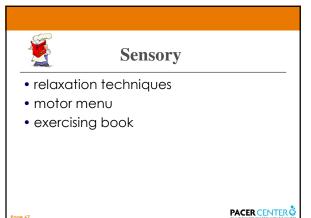

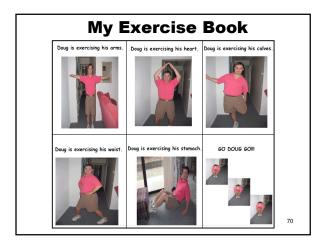

Relaxation Techniques 1. Breathe in slow. Breath out slow. Do 10-15 times. 2. Rub hands slowly from top of leg to knee. Do 10-15 times. 3. Squeeze stress ball hard. Relax. Do 10-15 times.

Structure/Organization

- schedules
- classroom rules

Page 7

PACER CENTER ©

Problem: Students don't know what is going to happen next which may result in behavior problems (uncertainty, anxiety)

Solution: Schedules

- Schedule for the day
 - On the wall
 - Portable
 - Symbols/Text
- Can be done to structure time within a scheduled activity

Page 72

PDAs and Online Calendars -Built in Palm calendar -Can also download or buy freeware and shareware • student planners • alarm clocks • digital reminders -Also available on the DANA (portable word processer with Palm features) -online calendars Google Calendars

Social Stories

- Activity Sequencing
- Explaining social rules and expectations
